Biography

I received my PhD degree (Reproduction and Artificial Insemination) in 2011 (Selçuk University). I have been working as a professor doctor at Atatürk University Faculty of Veterinary Medicine since 2023. I participated in national / international conferences, international programs. I am a member of scientific societies. I participated in national and international research on animal reproduction. My research focuses on the freezing of sperm cells in farm animals and I explore the effectiveness of antioxidants on reproductive parameters in mice. I am also interested in the biochemical and molecular mechanisms of sperm cell energy metabolism.
