

Space Journey

Dear: Orhan Ardahanlı

I am writing to invite you to participate in an upcoming exhibition focused on promoting the importance of space for humanity, taking into consideration the cultural backgrounds of different communities. As you are known for your exceptional and effective designs, your contribution would be greatly appreciated.

The purpose of this exhibition is to support positive concepts for people around the world, and to showcase how space is the future of humanity and how we can benefit from it on Earth. This will be the first exhibition of its kind, and will be held in the first Pharaonic city in Metaverse. Designers will be able to visit the exhibition using a special avatar that can tour the city and capture videos and selfies in an ancient Egyptian atmosphere that represents the great civilization of Egypt.

It would be an honor for me to have your participation in this international exhibition for the "Space Journey" poster. Your unique perspective and talent would make a valuable contribution to the

Sincerely,
Mona Abd Elsalam

Space Journey

The first international poster exhibition titled "Space Journey"

I am extremely excited to announce the launch of the first International Poster Exhibition titled "Space Journey"!

This exhibition is a unique event that relates to my passion for exploring space, where designers from all over the world with their diverse cultures come together to showcase their visions for the future of humanity in space exploration.

I am proud to announce that over 150 designers from 50 countries, including experts and professors in this field, have registered so far to participate in this amazing event.

But that's not all! What makes this exhibition truly unique and special is that it will be held in the heart of the city of "Metatut", which is the first Pharaonic city in Metaverse that represents the Egyptian civilization with its authenticity, where visitors will be able to explore the rich history of the Pharaonic Egyptians and immerse themselves in the world of the pharaohs through a specially designed avatar. You can explore the city, take selfies, and record videos of your experience.

We have many surprises waiting for you in the coming period, so stay tuned for more updates soon.

Sincerely,

Mona Abd Elsalam
